

MARKET REPORT – WEEK 29

BASED ON SALES AND PURCHASES OF VESSELS WEEK ENDED FRIDAY 23RD JULY 2021.

After a one-week minor glitch the BDI gained a further +5.3% during last week. The BCI, BHI and BHSI gained +13.7%, +3.5% and +4% respectively while the BPI retreated a little by -3%.

Interestingly, according to the current Baltic Exchange ratings, 38k handysize bulkers are now earning a daily average timecharter rate of about \$31,250 which is only \$1,220 daily less than the approximate \$32,450 daily that Capesizes are earning while 58k Supras are earning about \$31,580 and Kamsarmaxes \$31,760 daily.

On the S+P front a steady flow of bulkers of all sizes continue to change hands with values still in the ascendency, and unsurprisingly, due to their above mentioned super earning capacity, the most prevalent purchase enquiries circulating the S+P market at this time are for handysize bulkers which is understandable when owners of such ships are able to earn nearly as much as a cape or a panamax bulker via a cheaper investment. Tanker S+P activity on the other hand remains very slow with most owners unwilling to sell at current values.

Rates being offered by sub-continent recyclers have risen even further especially in Bangladesh where we understand a number of vessels have achieved over \$600 per LDT, with Pakistan following closely behind paying in the high \$500s. These exceptional prices are being paid due to a combination of a lack of vessels currently be offered for recycling, a strong domestic demand for steel for construction and the absence of the usual supply of cheap steel from China because China is currently using most of its own production domestically too. It should also be noted that the desperate Covid-19 situation in the sub-continent is still far from over, however, the requirement for all oxygen supplies to be routed to hospitals only is now being relaxed which is allowing the ship breaking yards to restart operations.

THE ABOVE INFORMATION IS GIVEN IN GOOD FAITH BUT WITHOUT GUARANTEE AS TO ACCURACY OF SAYING.
