

MARKET REPORT – WEEK 35

BASED ON SALES AND PURCHASES OF VESSELS WEEK ENDED FRIDAY 3RD SEPTEMBER 2021.

Just as the holiday season draws to a close the BDI registered a small -6.9% w-o-w loss last week with each Baltic dry sector closing a little down on Friday. The general consensus however is that it was more likely a quieter week due to the bank holiday on Monday and that the dry markets will resume normal service very quickly. It has actually been a feature of this years dry bulk trading that every few weeks there has been a one or two week blip with small BDI losses posted but then it has carried on its upward trajectory which has seen it go from 1606 points at the end of week one this year to the 4235 points it closed on at the end of week 34.

Irrespective of last weeks BDI movements buying interest remains firm for bulkers with ever firmer levels still being attained for all sizes and the most poignant negotiating item being whether the vessel's delivery to the buyer is to be promptly or a few months later, thereby granting the seller additional income before handover.

The subcontinent recycling markets remain very firm due to two main reasons: the first is the fact that virtually no bulkers or container vessels are currently being recycled while freight rates and prospects for them remain so high, leaving the breakers to try and outbid each other for available tanker and offshore units. And secondly because the recyclers are more confident that domestic steel prices will remain firm due to China having recently announced that they will no longer export steel to the subcontinent markets. Hence levels in excess of \$600 per LDT remain the norm for suitable / preferred tonnage.

THE ABOVE INFORMATION IS GIVEN IN GOOD FAITH BUT WITHOUT GUARANTEE AS TO ACCURACY OF SAYING.
