

## MARKET REPORT – WEEK 13

BASED ON SALES AND PURCHASES OF VESSELS WEEK ENDED FRIDAY 31<sup>ST</sup> MARCH 2023.

We are now in the lead up to consecutive Easter weekends (Catholic at the end of this week and Orthodox at the end of the week after), so we would usually anticipate a drop off in shipping activity around this period regarding both chartering and S+P, however, with the war in Ukraine showing no signs of ending anytime soon and the shipping markets continuing to distort themselves because of it, in respect of cargo loading and discharge areas, freight rates and vessel's values we will probably see fairly strong levels of activity maintained.

After making some gains during weeks 8-11 up to about 1535 points, the BDI has dropped back again over the past 2 weeks to 1389 points. Last week saw only the BPI make a small +4% w-o-w improvement, while all the other dry indexes closed down, the BCI by -11.5%, BSI by -10% and the BHSI by -2.3%. On the wet side the Baltic dirty index closed -12 % down and the clean index +4% up.

Handysize through to capes vessels are all reported sold during last week with none older than 2009 built, in fact there is strong buying enquiry at this time for modern eco Japanese built bulkers but very few actually for sale. On the tanker side MRs were very much flavour of the month in March during which about 26 such vessels reportedly changed hands.

Chinese steel production appears to have ramped up by about 70% during February and since domestic consumption is still low a lot of it has been exported which in turn has put pressure on demand for, and prices of, steel in the subcontinent. Accordingly, prices offered for ships by recyclers in Bangladesh fell for a 2nd week last week by another \$10 per LDT to about \$570 for bulkers, \$580 for tankers and \$615 for container vessels. Indian prices offered also reduced last week but only by \$5 per LDT bringing their respective offer levels down to region \$525 / \$540 / \$565. Pakistan meantime remains unable to compete at all due to their banks continued inability to issue LCs.
