

## MARKET REPORT – WEEK 29

BASED ON SALES AND PURCHASES OF VESSELS WEEK ENDED FRIDAY 21<sup>ST</sup> JULY 2023.

Apologies for our lack of commentary last week which was due to difficulties caused by last Monday's wildfires.

Apart from high temperatures and further major wildfires in areas of Greece and Europe during last week other major news stories include increasing inflation and interest rates throughout the western economies and President Putin unilaterally cancelling the grain export agreement which permitted Ukraine to ship its badly needed grain exports from its Black Sea ports, especially Odessa, which Russian forces have started bombing again.

The BDI continues to hover around the 1.000 level and last week dipped back below it to close on Friday on 978 points after a week which saw the BCI lose -12.9%, the BPI -15.6%, and the BHSI -2.2%, while only the BSI closed up by just +2.0% w-o-w.

In the S+P sectors, bulker sales volumes have now significantly reduced albeit values for modern eco tonnage have remained far more resilient while values of older vessels are now having to reduce a fair bit more in order to get deals done. On the tanker side, while a number of second hand vessels are still changing hands it seems that a few of the bigger fleet owners are now pursuing growth via newbuildings which will deliver circa 2025 / 2026. Their biggest specification decisions for such deliveries will likely be what fuel or dual fuels those new vessels will burn...

The subcontinent recycling sector remains very quiet. Apart from the lack of vessels being offered for breaking, Pakistan remains closed due to non-availability of LCs, Bangladesh has similar but less acute LC issues, while India is basically sitting on its hands during the current monsoon season as domestic steel prices continue to fall.
